CASE STUDY

Technology used:

DUKES OF SOUTHSEA

Honeywell

This specialist furniture business needed a monitored intruder alarm system to minimise the chances of further break-ins after previous burglaries at neighbouring shops.

Solution

We installed a fully monitored Honeywell Galaxy alarm system with dual-technology motion detectors to reduce the chances of false alarms, door contacts, vibrations sensors, break-glass and panic buttons.

Challenges

Working safely around an asbestos ceiling within a short timeframe to be ready for the opening of the shop.

Results

A fully monitored intruder alarm system was active on the same day as installation, with a backlit bell-box providing a strong deterrent to would-be intruders.

Solutions installed:

Intruder
